

Poo Poo Splatter

Some acts of vandalism are more enjoyable to clean up than others. Take this portable toilet. It got permanently flushed when some joker pooped (oops, I mean popped) an M-80 in the john. Ha ha, funny. When it went off, I hope the vandal got splattered with ... well, you know.

So what's the point of posting this pic? I know it's after July 4th and all, but I've just seen too many yucky pictures of people who have mishandled fireworks lately. (No I'm not interested in seeing more). If you plan to use fireworks any time in the future, just remember...if a firecracker can do this to a solid structure, imagine what would happen if it exploded prematurely in your hand. Shrapnel doesn't feel good either. Just be safe out there.
